Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-7 (Cancelled)

8. (Currently Amended) A process for fabricating a water-swellable filter_porous plug, comprising the steps of

providing a filter porous substrate comprising a plurality of passageways therethrough, disposing into the passageways a hydrophilic polymer,

subsequent to the disposing step, irradiating the substrate and the hydrophilic polymer, to induce cross-linking of the hydrophilic polymer, such that the polymer forms a hydrogel coating on the walls of the passageways, wherein the hydrogel coating swells upon contact with water.

- 9. (Currently Amended) The process of claim 8, wherein the filter porous substrate is formed from a plastic.
- 10. (Previously Presented) The process of claim 8, wherein the hydrophilic polymer is selected from the group consisting of polyalkyleneoxides, polyvinylpyrrolidone, polyvinyl alcohol, polyvinylacetate, polyhydroxyalkyl, polystyrene sulfonate, and mixtures thereof.
- 11. (Previously Presented) The process of claim 10, wherein the hydrophilic polymer is polyvinylpyrrolidone.
- 12. (Previously Presented) The process of claim 8, wherein the irradiation is gamma irradiation or electron beam irradiation.
